

CONFIDENTIAL • INVESTOR & JURY PITCH DOSSIER

FasalSanjha (फसल साझा)

"Sow Together. Share the Harvest." & "Jodta Hai Kisan Ko, Bazaar Se"

A Comprehensive End-to-End Agri-Fintech & Agricultural Value Chain Marketplace. Replacing predatory rural debt with transparent, equity-like crop investment agreements, verified by satellite NDVI and smart escrow milestones.

PITCH CORE THESIS

"Farmer kheti karega, investor paisa lagayega — FasalSanjha dono ko jodega." Land ownership is 100% safeguarded under Section 5(1) MLRC; investors earn attractive real-asset returns (18–32% IRR); and smallholder farmers double net income debt-free.

Company: Bharat Agri-Financial Services Pvt. Ltd. (Pre-Launch)

Pilot Focus: Nashik, Pune & Ahmednagar (Maharashtra)

Target Market: 146M Indian Farmers & ₹8.5L Cr Agri Credit

Founder / Presenter: Yash Patil & Team

Live Demo:

<https://mrpatil15.github.io/fasalsanjha/>

Document Version: 1.0 (Investor Pitch Edition)

1. Executive Summary & The Problem

The Farmer's Crisis (Debt Trap)

- **86%** of Indian farmers are small/marginal (<2 hectares).
- Formal bank credit requires heavy collateral and bureaucratic approval cycles that take 3–6 weeks — arriving too late for optimal sowing windows.
- Farmers resort to local moneylenders charging **24% to 36% compound annual interest**.
- In drought or pest attacks, debt compounds, leading to land mortgage loss and severe distress.

The Investor's Dilemma

- Retail and HNI investors hold over ₹65 Lakh Crore in low-yielding fixed deposits and volatile stocks.
- Agriculture offers 18–32% cyclical real-asset returns, but investors face zero access, opaque middlemen, and fears of agrarian disputes.
- **The Gap:** No institutional bridge exists providing legally binding, insured, satellite-monitored crop investment agreements.

2. The 12-Stage Closed Loop Ecosystem

FasalSanjha does not just lend money; it powers the entire agricultural operating cycle across 12 connected stages:

01. LAND

Geo-tagged farm, 7/12 extract & soil health verification.

02. FUNDING

Peer-to-peer crop equity via Tripartite Escrow Agreement.

03. INPUTS

Direct seeds & organic fertilizers with in-app counter-offers.

04. CULTIVATION

Agronomist advisory & micro-climate weather alerts.

05. MONITORING

Sentinel-2 Satellite NDVI & ground agent visits.

06. HARVEST

Yield grading, moisture check & QR tracking.

07. STORAGE

WDRS-certified granaries & cold storage booking.

08. PROCESSING

Connecting dal, oil, flour mills & juice units.

09. LOGISTICS

Tractor, mini-truck & reefer dispatch with GPS.

10. BUYER

F2B grocery chains, exporters & mandi traders.

11. SALE

e-NAM benchmark price discovery & B2B contracting.

12. SETTLEMENT

Automated waterfall escrow split & PDF statement.

Core Takeaway for Pitch: While competitors offer fragmented point solutions (only lending, or only input commerce, or only mandi price info), FasalSanjha unifies the complete chain so that an investor's rupee can be traced through seeds, soil, satellite images, harvest, and sales invoice.

3. The Core Innovation: Crop Equity vs Predatory Debt

Traditional agricultural financing treats crops as credit collateral. FasalSanjha restructures crop production into a **limited-liability, cyclical joint venture**:

Feature	Traditional Moneylender	Kisan Credit Card (Bank)	FasalSanjha Model
Cost of Capital	24% – 36% compound interest	7% – 9% simple interest	0% Interest (Agreed profit-share e.g., 65/35)
Crop Failure Scenario	Debt traps farmer; land seized	Default, CIBIL ruined, penalty fees	Loss Shared; Capital insured 50–70%
Collateral Required	Gold, Land deeds, Blank cheques	7/12 Land extract mortgaged	Zero Collateral (Crop production agreement)
Capital Disbursement	Lump sum cash (often misspent)	Lump sum credit line	3 Escrow Tranches tied to verified milestones
Monitoring	None (only collection harassment)	None	Satellite NDVI + Ground Field Agent

Land Ownership Protection (Section 5(1) MLRC)

Ironclad Legal Guarantee: Investors NEVER acquire any rights, liens, or claims over the farmer's land. The Tripartite Agreement explicitly restricts investor rights to the economic proceeds of the specific crop harvest. Section 5(1) of the Maharashtra Land Revenue Code protects agricultural land against alienation to non-agriculturists.

4. Agronomic Risk Scoring Matrix (Grades A, B, C)

Every crop listing submitted by a verified farmer undergoes automated and field-agent underwriting before going live:

GRADE A (Low Risk)

Established Cycles

- Perennial / Drip-irrigated crops (Soybean, Wheat, Onion, Grapes).
- Farmer track record: >3 successful cycles.
- Soil test score > 80/100.
- **Target Return:** 14% – 18% IRR.
- **Investor Share:** 25% – 35%.

GRADE B (Moderate Risk)

High Value Seasonal

- Rainfed + supplemental well irrigation (Cotton, Pulses, Tomato).
- Farmer track record: 1–3 cycles.
- Weather variance protection active.
- **Target Return:** 18% – 24% IRR.
- **Investor Share:** 35% – 45%.

GRADE C (Higher Risk)

Intensive Commercial

- Exotic vegetables, strawberry, floriculture.
- Price volatility sensitive.
- Mandatory PMFBY + Capital Insurance cover.
- **Target Return:** 24% – 32% IRR.
- **Investor Share:** 45% – 55%.

5. The 5 User Personas (Clickable in Demo)

Persona	Name & Profile	Goals & Value Delivered	Key Demo Screens
 Farmer	Ramesh Patil Nashik, MH • 3 Acres Crops: Nashik Red Onion & Soybean	Accesses ₹45,000 seasonal working capital without mortgaging land; buys verified seeds at wholesale; receives automated payout.	Farmer Dashboard, Create Listing Wizard, Milestone updates, Payout summary.
 Investor	Neha Sharma Mumbai • FinTech Executive ₹50,000 Portfolio across 4 cycles	Diversifies into high-yield agricultural real assets with satellite transparency, escrow safety, and automated tax statements.	Invest Marketplace, Tripartite E-Sign Modal, NDVI Satellite Monitor, Portfolio Donut.
 Business Buyer	Fresh Basket Retail Thane • 14 Retail Outlets Buys 10T Onion / 5T Wheat weekly	Sources directly from verified farm clusters; avoids 4 layers of APMC mandi middlemen; guaranteed quality grades.	F2B Portal, Post Requirement Radar, Logistics Dispatch tracker, B2B Invoicing.
 Labour & Landowner	Sunita Jadhav (Labourer) Mr. Kulkarni (NRI Landowner, 8 Acres idle)	Landowner earns 40% crop return on idle land safely; agricultural labour gets legally enforced 30–60% produce share.	Land & Labour Hub, Sharecropping agreement preview, Harvest split calculator.
 Admin / Agent	Field Operations Desk District Field Lead, Nashik Cluster	Verifies 7/12 land extract, inspects seed germination, approves milestone escrow tranche disbursements.	Admin Verification Queue, Dispute Arbitration Desk, Satellite NDVI manual override.

6. Deep-Dive: The Tripartite Agreement & Smart Escrow

- 1 Farmer Listing Creation:** Farmer enters crop type, acreage, working capital needed (e.g. ₹50,000), tenure (120 days), and proposed profit split (70% Farmer / 30% Investor).
- 2 Investor Backing & Legal E-Sign:** Investor browses listings, picks Grade A Nashik Red Onion, selects investment amount (min ₹5,000), reviews the auto-generated Tripartite Crop Investment Agreement, and e-signs via OTP.
- 3 Capital Deposited in Escrow Account:** Funds do not go directly into the farmer's personal savings account. They are held in a scheduled bank escrow account operated by Bharat Agri-Financial Services.
- 4 3-Tranche Milestone Disbursement:**

- **Tranche 1 (40% - ₹20,000):** Disbursed upon land tilling and verified input purchase (seeds & base fertilizer).
- **Tranche 2 (35% - ₹17,500):** Disbursed at 45 days post-germination upon field agent geo-tagged photo & NDVI verification.
- **Tranche 3 (25% - ₹12,500):** Disbursed at 80 days pre-harvest for labour, pest-spray, and harvest crates.

5 Harvest, Direct Sale & Waterfall Split: The produce is sold directly to Fresh Basket Retail at ₹2,200/quintal. Gross proceeds (₹88,000) are routed back into the Escrow.

7. The Waterfall Settlement Mechanics

Here is the exact real-world financial settlement executed in the demo for Cycle #FS-2026-08 (Nashik Red Onion, 3 Acres):

Harvest Financial Metrics

- **Initial Working Capital:** ₹50,000 (100% funded)
- **Harvest Yield:** 40 Quintals (Grade A export quality)
- **Realized Sale Price:** ₹2,200 / Quintal
- **Gross Revenue Realized:** ₹88,000
- **Net Profit Generated:** ₹38,000

Waterfall Escrow Split

- **Investor Capital Returned:** ₹50,000
- **Investor Profit Share (35%):** ₹13,300
(Total Investor Payout: ₹63,300 → **26.6% absolute return in 120 days**)
- **Farmer Profit Share (65%):** ₹24,700
(Farmer took ₹0 debt, got full inputs, and pocketed ₹24,700 clean profit)
- **FasalSanjha Platform Fee (5% on net profit):** ₹1,900

8. FasalSanjha Bazaar: The 11 Core Modules

Beyond crop funding, FasalSanjha is a comprehensive B2B/B2C agri-commerce marketplace:

Module	What It Does	Key Innovation / Commercial Model
1. Agri-Inputs	Certified seeds, bio-fertilizers, organic pesticides, micro-nutrients.	In-App Negotiation: Buyer can send counter-offers. 20% marketing + 10% shipping fee.
2. Equipment Rental	Tractors, rotavators, power tillers, sprayers, threshers.	Per-day rental booking with security deposit escrow; saves smallholder capex.
3. Sell Produce	Farmers post upcoming harvest with grade, photos, expected price.	Pre-orders from institutional buyers before harvest reduces price crashes.
4. Fodder & Feed	Silage, green fodder, crop residue, cattle feed for dairies & gaushalas.	Eliminates stubble burning by monetizing crop residue directly to milk federations.
5. Land & Labour	Matches idle agricultural land with skilled landless labourers.	Legally vetted 30–60% crop-sharing contracts. Land ownership never mortgaged.
6. Farm-to-Business (F2B)	Direct supply to supermarket chains, cloud kitchens, hotel aggregators.	Pre-harvest contract farming agreements with quality specifications.
7. Agri-Processing	Flour, dal, edible oil, spice, and fruit pulping units.	Connects raw crop producers to processors for value-added 15–30% higher realization.
8. Storage & Granaries	WDRA-registered state warehouses, cold storages, private silos.	Instant booking with negotiable warehouse receipt (e-NWR) pledge financing.

Module	What It Does	Key Innovation / Commercial Model
9. Logistics Fleet	Farm-to-mandi / farm-to-warehouse transport on demand.	GPS-tracked tractor trolleys, pickup trucks & refrigerated reefers.
10. Export / Import	Cross-border certifications (APEDA), phytosanitary, international trade.	Connecting FPOs to Gulf & European importers for GI-tagged crops (Nashik Grapes, Onions).
11. Market Intelligence	Live APMC mandi rates, 30-day price trend graphs, demand-supply indicators.	e-NAM linked price alerts help farmers decide when to harvest and sell.

9. Hero Feature: "Post Your Requirement" Matching Radar

Instead of manually browsing hundreds of listings, any stakeholder (farmer, restaurant, flour mill, trader) can post a single requirement:

Example Query in Demo: "Need 10 Tonnes Wheat, Grade A, Delivered to Thane by October 15, Budget: ₹2,400/Qtl"

Upon submission, FasalSanjha's algorithmic radar engine scans nearby clusters and instantly returns ranked matches:

1. Ramesh Patil (Farmer, Nashik) • 96% Match

Has 12 Tonnes Sharbati Wheat harvesting Oct 12. Quoted ₹2,350/Qtl. [Direct Chat / Order]

2. Jai Kisan Transporters (Nashik) • 94% Match

10-Tonne Eicher Truck available Oct 13. Rate: ₹4,200 total freight to Thane. [Book Transit]

3. Mahagenco Cold Storage (Kalyan) • 91% Match

WDRA Warehouse 8km from Thane delivery point. Space reserved for 15 days. [Reserve]

4. Sahyadri Agri Processors • 88% Match

Cleaning, grading & 25kg vacuum packaging available at ₹40/bag. [Attach Service]

10. Business Model & Financial Unit Economics

FasalSanjha generates recurring revenue from multiple non-conflicting points along the agricultural value chain:

5.0%

CROP SETTLEMENT SUCCESS FEE

Charged on net profit generated upon final harvest sale.

2.5%

BAZAAR COMMERCE TAKE RATE

Charged on inputs, fodder, processing, and equipment transactions.

1.0%

INVESTOR MANAGEMENT FEE

Annualized asset servicing fee for portfolio tracking, escrow & tax filing.

3-Year Financial Projections (Pilot to Scale)

Metric	Year 1 (Pilot - 3 Districts)	Year 2 (State - Maharashtra)	Year 3 (National - 5 States)
Active Cultivated Acres	1,500 Acres	18,000 Acres	120,000 Acres
Gross Merchandise Value (GMV)	₹7.50 Crore	₹95.00 Crore	₹640.00 Crore
Platform Net Revenue	₹48.75 Lakh	₹6.17 Crore	₹41.60 Crore

Metric	Year 1 (Pilot - 3 Districts)	Year 2 (State - Maharashtra)	Year 3 (National - 5 States)
Gross Margin	68%	76%	82%
Net EBITDA	-₹18.50 Lakh (Pilot setup)	+₹1.85 Crore (Profitable)	+₹18.20 Crore

11. 14-Slide Pitch Deck Summary (Presenter Guide)

Slide 1 (Title): FasalSanjha — "Sow Together. Share the Harvest." Bharat Agri-Financial Services Pvt. Ltd.

Slide 2 (The Agrarian Crisis): ₹8.5 Lakh Cr debt market; 86% smallholders paying 24-36% predatory interest.

Slide 3 (The Solution): Crop Equity & Smart Escrow — Interest-free funding, shared harvest risk, guaranteed land safety.

Slide 4 (The Complete Chain): Land → Funding → Inputs → Cultivation → Monitoring → Harvest → Storage → Processing → Sale.

Slide 5 (Farmer Value Prop): Ramesh Patil story: 0% debt, quality inputs, guaranteed off-take, 2.2x net income.

Slide 6 (Investor Value Prop): Neha Sharma story: 18-32% IRR real asset returns, satellite NDVI verification, capital loss protection.

Slide 7 (Tripartite Legal Framework): Section 5(1) MLRC compliance; land can NEVER be mortgaged or transferred.

Slide 8 (Technology Moat): Sentinel-2 satellite vegetation indexing, IoT weather integration, automated waterfall escrow.

Slide 9 (FasalSanjha Bazaar): 11 working modules (inputs, equipment, fodder, granaries, cold storage, B2B, processing).

Slide 10 (Matching Radar): Instant multi-party requirement matching engine with real-time transit & storage booking.

Slide 11 (Market Size & TAM): Total Addressable Market: ₹8.5 Lakh Cr crop finance; Serviceable: ₹42,000 Cr in MH & MP.

Slide 12 (Business Model): 5% settlement take rate, 2.5% marketplace commission, 1% investor fee. High gross margins (>75%).

Slide 13 (Traction & Unit Economics): ₹7.5 Cr GMV in Year 1 pilot across Nashik, Pune & Ahmednagar.

Slide 14 (The Ask & Vision): Raising ₹1.5 Crore Seed to onboard 10,000 farmers and deploy 50 cluster field agents.

12. Top 5 Tough Investor Questions & Answers

Q1: What happens if there is a severe drought or hailstorm and the crop fails completely?

Answer: Unlike bank loans where the farmer is ruined, FasalSanjha integrates dual insurance: 1) Pradhan Mantri Fasal Bima Yojana (PMFBY) covering yield loss for the farmer, and 2) Parametric private capital protection cover for investors (triggered by verified rainfall/satellite deficits), returning 50% to 70% of invested principal. The remaining loss is shared according to the tripartite equity contract.

Q2: What prevents the farmer from selling the harvest in the black market and claiming it was lost?

Answer: Three layers of tamper-proof verification: 1) Weekly automated Sentinel-2 satellite NDVI scans flag pre-harvest harvesting activities in real time; 2) Local cluster field agents visit 10 days before harvest to estimate tonnage; 3) All transport from farm gate must be booked through FasalSanjha Logistics with GPS e-way bills to unlock final tranche payouts.

Q3: Is this considered collective investment or NBFC lending by RBI / SEBI?

Answer: No. FasalSanjha operates as a technology facilitator for bilateral / tripartite Agricultural Production Agreements under the Indian Contract Act, 1872. There is no pooled fund, no guaranteed debt return, and money stays in a scheduled bank escrow account until milestone conditions are verified.

Q4: How do you acquire farmers in rural India?

Answer: Through local FPOs (Farmer Producer Organizations), village Krishi Seva Kendras, and our commissioned field agents (local agri-diploma graduates who earn 1% on verified settlements). We don't acquire individual farmers cold; we onboard entire 50-farmer clusters at once.

Q5: What is your primary competitive advantage against DeHaat, Ninjacart, or Samunnati?

Answer: Ninjacart focuses solely on B2B supply chain logistics; DeHaat focuses on input retail; Samunnati provides debt NBFC loans. FasalSanjha is the ONLY platform connecting retail/institutional capital directly to crop equity, aligning the economic incentives of farmer, investor, and buyer in a closed loop.
